Submitting Payroll Hours

Obtain All Necessary Payroll Info from the Client:

If your client utilizes Kronos, uAttend, or Simple VMS, please refer to the separate training guides below for these platforms to review instructions on how to view time cards and run a payroll report

- Gather the following information (as applicable):
    - Prior week hours worked by associate
    - Specialty pay
        - Training hours to be paid out (Include the wage they're paid out at if different from standard pay rates, and notify payroll whether or not these hours are billed to the client)
        - Show up pay (This can be included in the body of the email you submit to payroll listing the associate's name and the number of show up pay hours to be paid out)
        - Bonus payouts for attendance/milestones/holidays (Notify payroll if these bonuses should have a different mark-up rate)
    - Deductions for unreturned uniforms, badges, tools, etc
    - ESTA time (added to branch spreadsheets)

Note: *Payroll should be notified in advance of any upcoming pay rate, bonus, or mark-up changes. Send an email to the payroll team ASAP once you're aware of a change, and find out from the client if any changes are needed on the invoice (example: separate line items for bonuses and how the client wants the bonus titled on the invoice).
